

**Listing of Claims:**

The following listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently amended) A spray coating unit for treating a moving paper or board web with a treating agent, the spray coating unit comprising:

an application chamber, through which the web to be treated is arranged to travel, the application chamber comprising an inlet opening for leading the web into the application chamber and an outlet opening for leading the web out of the application chamber;

at least one row of nozzles ~~comprising at least one nozzle~~ for spraying the treating agent on the surface of the web in the application chamber; and

spraying members for spraying water mist into the application chamber.

2. (Previously presented) The spray coating unit of claim 1, wherein the spraying members are provided with members for atomizing water mist into an average drop size of no more than 150  $\mu\text{m}$ .

3. (Previously presented) The spray coating unit of claim 1 wherein the spraying members are located in the vicinity of the inlet opening at least on one side of the web.

4. (Previously presented) The spray coating unit of claim 3, wherein the spraying members are located in the vicinity of the inlet opening on both sides of the web.

5. (Previously presented) The spray coating unit of claim 1, wherein the spraying members comprise nozzles that are fitted next to each other in the cross direction of the web.
